PROFESSIONAL SUMMARY

High-impact Software Engineer and **Power Platform Developer** with **5+ years of experience** architecting and shipping enterprise-grade Solutions using **Power Pages, Power Apps, Power Automate, Power BI, Dataverse, SQL Server, and REST, FHIR APIs**. Proven expertise engineering scalable Automations, driving CI/CD-enabled ALM pipelines, and performing rapid Debugging and Root Cause Analysis (RCA) to keep mission-critical systems running. Track record of automating enterprise workflows, integrating healthcare systems, and slashing manual effort by up to 40% - turning ambiguous requirements into production-ready Solutions that move the business forward.

TECHNICAL SKILLS

Low-Code / No-Code: Power Pages, Power Automate, Power Apps (Canvas & Model-Driven), Power BI

Data & Backend: Microsoft Dataverse, SharePoint Online, SQL Server (Queries & Stored Procedures), REST APIs, FHIR APIs, JSON

Cloud & Productivity: Microsoft 365, Azure Active Directory, Microsoft Teams Integration

Programming: SQL, Power Fx, DAX, JavaScript (basic), HTML/CSS

DevOps & Reliability: CI/CD (Power Platform Pipelines, Azure DevOps), Debugging, Root Cause Analysis (RCA), Solution Lifecycle Management (ALM)

Domain: Healthcare workflows, authorization processes, clinical documentation, system integrations

Soft Skills: Problem-Solving, Requirements Gathering, Stakeholder Communication, Mentoring

PROFESSIONAL EXPERIENCE

Software Engineer

June 2026 - Present

Mobio Solutions | Ahmedabad

- Spearheaded design and development of enterprise Power Platform Solutions - leveraging Power Apps, Power Pages, Power Automate, Dataverse, SQL Server, REST APIs, and JSON - to automate complex business workflows end-to-end.
- Engineered high-value Automations in Power Automate, including HTTP-triggered flows, conditional logic, business-rule validation, document processing, and API integrations, eliminating manual downstream actions.
- Built REST and FHIR API integrations to retrieve, filter, validate, and process critical data and documents across external systems, strengthening cross-platform interoperability.
- Designed and optimized SQL Server queries and stored procedures for high-performance data retrieval, filtering, pagination, status mapping, and business-rule validation.
- Enhanced Power Pages applications with server-side data retrieval, advanced search, filtering, pagination, and optimized data-grid performance for large-scale datasets.
- Delivered document processing and validation Automations for structured business and clinical documentation, tightly integrating retrieval and validation into core workflows.
- Owined Debugging and RCA (Root Cause Analysis) across Power Pages, Power Automate, SQL Server, Dataverse, and external APIs - resolving complex business-rule and workflow-condition defects to minimize downtime.
- Drove CI/CD-enabled Power Platform ALM across Dev, QA, UAT, and Production environments, owning solution management, configuration, testing, Debugging, and release coordination.
- Contributed to a mission-critical enterprise healthcare Solution, gaining hands-on expertise in healthcare workflows, authorization processes, clinical documentation, and system integrations.

Senior Associate - Power Platform Developer

September 2023 - June 2026

Nu-Pie Management Consultancy Services Pvt Ltd | Bengaluru

- Spearheaded end-to-end design and delivery of enterprise Power Platform Solutions; partnered with stakeholders to translate requirements into robust Canvas and Model-Driven applications.
- Architected scalable Dataverse data models and established governance standards across Power Platform environments organization-wide.
- Mentored junior developers and led code reviews, strengthening code quality, performance, and long-term maintainability.

- Championed CI/CD adoption by building automated solution deployment pipelines with Azure DevOps and Power Platform Pipelines, accelerating release velocity.
- Delivered 10+ Canvas and Model-Driven Power Apps (management, vendor tracking), cutting manual effort by ~40%.
- Engineered complex, multi-step Power Automate Automations integrating SharePoint, Dataverse, Teams, Outlook, and third-party APIs - automating approvals and real-time notifications.
- Designed and published Power Pages portals empowering external stakeholders to securely submit and track requests, cutting turnaround time significantly.
- Built interactive Power BI dashboards consolidating multi-source data into real-time insights for senior leadership.
- Owned Dataverse environment management - entity configuration, business rules, security roles, and ALM pipelines across Dev/Test/Prod - including proactive Debugging and RCA to safeguard system reliability.

Associate Consultant

February 2021 - August 2023

Ariatech IT Solutions Pvt Ltd | Hyderabad

- Designed end-to-end Power Apps Solutions for enterprise clients, reducing process cycle times and improving data accuracy.
- Built Power Automate Automations replacing repetitive manual processes, saving 20+ hours per week across client teams.
- Developed SQL queries and data transformation logic powering Power BI reporting and analytics pipelines.
- Configured SharePoint Online lists, libraries, and permissions as data backends for multiple Power Apps Solutions.
- Owned full project lifecycle - requirements gathering, solution design, UAT, deployment, Debugging, and post-go-live support.
- Authored technical documentation, user guides, and runbooks enabling smooth client handovers.

EDUCATION

Bachelor of Technology

August 2015 - November 2019

Jawaharlal Nehru Technological University, Kakinada

KEY ACHIEVEMENTS

- Automated 15+ business processes across client engagements, driving measurable efficiency gains and reducing operational overhead.
- Delivered a high-impact Power BI reporting suite consolidating data from multiple sources, eliminating siloed reporting for senior leadership.
- Maintained a technical blog (adusumallimanohar9.blogspot.com) sharing Power Platform development best practices with the community.
